

# LOCAL GOES GLOBAL!

Come spend the day with us and discover how Linguistic Landscapes (LL) can be integrated in language education. In the morning, the project coordinator will present the principles and aims of the LoCALL project through a guided visit to our website. In the afternoon, LoCALL teachers will share their experiences with the pedagogical use of LL and explain how they are promoting language awareness and intercultural education. Join us in this event by commenting, asking questions, and sharing your own ideas!
